

How we are protecting our patients and team members through changing COVID guidelines.

**Cleaning:** We are continuing to clean tables and stations after use.

**Feeling Sick:** We ask that anyone feeling sick stay home.

**Additional Precautions:** As guidelines update, we will update with them. This is a work in process.

**Team members:** Regardless of vaccination status, team members will continue to wear masks. This will be re-assessed on a monthly basis.

***We are continuing to assess feedback and instruction from:***

- Federal, State, County, City, and CDC guidelines regarding mask wearing and other Covid related precautions.
- We continue to update our regulations associated with airborne (COVID) virus control.
- Please be patient as we are adjusting as we learn.
- Precautions will continue to be Re assessed periodically as we gain more knowledge and information.
